

How can I make money using my current resources?

My current resources are a Smart-Device. A paperwork to express some ideas on a paper and a book about positive energy.

I have internet, as well. I can schedule meetings about how to comprehend and work in Stock-Market world.

I'm not an expert at this topic. However, I could learn many things during this last time. So, I can give a talking to people who want to introduce into this topic kind.

Eventually, I would give a talking for about 30 minutes.

Next time, on the next meeting, I may set up a price and make it affordable for everyone.

However, I was testing already the application ***Invertir-Online***, which is an Argentinian application, which is quite good to start testing and operate through.
